In pursuance of Departmental Order of April 25, 1912, providing for description according to new surveys of lands included in withdrawals, I recommend the approval of the following order (Power Site Interpretation No. 11) which conforms the description of certain lands included in Power Site Reserve No. 740, Rio Grande and Rio Colorado, New Mexico, North Fork Feather River, California, to the official plat.

As neither the Rio Grande nor the Rio Colorado is meandered in this township it is impossible to describe the land lying on the north and west banks by lots. Accordingly, all subdivisions cut by the river have been included in this interpretation, which now lists as part of Power Site Reserve No. 740, certain lands on the south and east banks of the river which are also included in Carson National Forest. These lands, however, were designated for water power in Water Power Designation No. 1, New Mexico No. 1, approved August 7, 1916.

Sir:

In pursuance of departmental order of April 25, 1912, providing for descriptions according to new surveys of lands included in withdrawals, I recommend the approval of the following order (Power-Site Interpretation No. 148) which conforms the description of certain lands in T. 25 $\frac{1}{2}$ S., R. 1 E., and T. 26 S., R. 1 E., Willamette Meridian, Oregon, included in Power-Site Classification No. 162, Oregon No. 16, Umpqua River and Tributaries, to the official plats.
